

About the Certification Exam

- **Type.** The exam is open-book and open-platform. During the exam, you can access the AtomSphere Documentation, published Community Knowledge articles and the Platform itself, to help answer the questions.
 - *Exams are not a collaborative effort. Posting or sharing of exam questions/answers in any forum (e.g., Community) is strictly prohibited and may result in disqualification.*
- **Content.** The General Knowledge Section consists of multiple-choice questions. It is intended to assess your understanding of the core competencies presented in each course. Some exams also include a Practical Section which consists of multiple-choice questions. However, these items require you to further apply concepts to determine the correct answers. You may also have to build processes to correctly answer the questions.
- **Time Limit.** There is no time limit during which you must complete the exam.
 - **Please do NOT leave your exam open in your browser.** If you wish to continue or review your exam later, please close the exam to save your progress. If your browser session times out with the exam open, this can cause errors and auto submission. The Training and Certification site retains your progress and will allow you to continue from where you left off.
- **Scoring.** In order to pass the exam, you must achieve a score of at least 80% in each section of the exam. There is no partial credit for questions that require multiple answers. Questions left unanswered are scored as incorrect and will negatively impact your score.
- **Retake Options:** You are allowed unlimited attempts to pass each section of the exam. You must retake that section until a passing score is achieved. If you do not successfully pass an attempt, there is a mandatory 2 day "cooling off" period before another attempt will be unlocked. Use this waiting period to review your course materials and other resources available to you to prepare for your next attempt.
- **Study Options.** Review materials found in the User Guide and Community. Review lessons and materials from your training courses. Use your Platform training account to do hands-on practice building processes and configuring components.
- **Completing the Exam.** Once you pass the exam, you may access your Training and Certification transcript to download your certificate.
- **Troubleshooting.** If you experience any connectivity or functionality issues during the exam, please email training@boomi.com immediately and give as much detail as possible. A Boomi Education Services Team Member will respond to your inquiry promptly.
